

## American College of Education (ACE) Employer Perceptions Survey Results

*CAEP Annual Reporting Measure 3 – Satisfaction of Employers (Component 4.3 | A.4.1)*

To monitor our performance as an education preparation program, ACE needs feedback from stakeholders that hire our graduates. To get this feedback, the Employer Survey is administered by internal units. The Employer survey is distributed biannually to the K-12 institutions our graduates are employed to measure their satisfaction of the preparation of ACE's most recent EPP completers for their assigned responsibilities in working with P-12 students. Questions on the survey are aligned with standards to rate the readiness and effectiveness of completers who go through ACE's programs.

An analysis of the 2018 responses revealed that 100% of all employers of initial level completers (MAT/T2T/M.Ed. in EL) agreed or strongly agreed that they were satisfied with the overall on-the-job performance of the completer. One hundred percent of employers of all initial level candidates strongly agreed that performance on use of evidence-based learning and assessment was evident in their behavior at work. Finally, 100% of all employers of initial level completers agreed or strongly agreed they were satisfied with the overall on-the-job performance of the completer. When asked if they would hire this completer again, 100% of employers of initial level completers agreed or strongly agreed.

### ACE Employer Survey Average by Question

1 – Strongly Disagree    2 – Disagree    3 – Neutral    4 – Agree    5 - Strongly Agree

## American College of Education (ACE) Completer Impact Survey Results

*CAEP Annual Reporting Measure 3 – Satisfaction of Employers (Component 4.3 | A.4.1)*

The Completer Impact Survey was sent out to all of our Educational Leadership program, Transition to Teaching Elementary and Secondary certificate, and Master of Arts in Teaching Elementary and Secondary program alumni from May 2013 until May 2019 – without including alumni who had participated in previous Completer Impact Surveys.

The survey was sent to 4,567 alumni of which 578 (12.66%) responded. Almost 98% of the respondents stated they are working in a school setting. 79% of the respondents believe their district evaluations reflect the positive impact they have had in their setting.

Alumni were also asked if they had implemented something new in their workplace/classroom and then evaluated the effectiveness of the change. The chart below is a summary of the responses followed by a few examples related to this survey question:

**Source: ACE Completer Impact Survey**

*“Yes, for several years I completed an “action research” project, testing the effectiveness of various theories and strategies. For example, technology in the classroom, specific behavior strategies, and even coaching other teachers in such. To be honest I was motivated to do this initially because it was required by my district. However, as I began working the motivation continued because I saw improvements and how I was growing as a teacher.”*

*“We have implemented the use of purpose statements which are posted in all classrooms. They reflect current student learning and allow students to be informed of what they will be learning, and how they can apply it to real-world settings. Students reflect upon the purpose statements and talk about what they are learning with others. We were motivated to create the change as a staff from research about student achievement and motivation in correlation with their understanding of their “purpose” for learning.”*

*“Something I have implemented in my classroom was Kagan cooperative learning activities. I would often use traditional review activities, then use a Kagan activity. I would see better student participation, engagement, and retention of information which reflected increased student performance on assessments.”*

**Source: ACE Completer Impact Survey**

Alumni were also asked if they have received an award or recognition for their hard work. Forty one percent of those who responded to the survey have received an award or recognition since graduating from an ACE program.

<b>Has Alumni Received an Award or Recognition</b>					
<b>Program</b>	<b># of Respondents</b>	<b># of "Yes" Responses</b>	<b>Response Rate</b>	<b># of "No" Responses</b>	<b>Response Rate</b>
Certificate in Transition to Teaching in Elementary Education	4	1	25%	3	75%
