

→ What ACE Students Say

"It was like [the classes] were designed for me personally. I liked the structure of them; I liked the way teachers gave feedback. I attended [a different] online college and all we did was work, work, work, but nothing was really applicable or practical. At ACE, our assignments are geared to provide application right now."

- Shantram Hawkins, Ed.S. in Leadership 2016, Ed.D. in Leadership 2020

"Everybody is very friendly and welcoming, and there's always something new. I never get bored with ACE. They have a tutoring program. They have a writing center. They have a blog. And I just think they're always thinking about what is needed. They're always branching off to meet the current needs of society. ACE is always on the move and they're always thinking ahead."

- Andrea Parker,
M.Ed. Educational Leadership 2017,
Ed.D. Leadership 2020

"There's no reason to wait. ACE was a perfect fit for me because of the cost effectiveness.

I was also able to go at my own pace. So when I was a little busier, I was able to slow it down, take one class at a time. And when I did have more time, I was able to speed it up and finish the program a lot quicker than expected. I think it would be great for anyone."

- Samantha Recknagel, M.Ed.
Curriculum & Instruction 2017

"I am so thankful for this amazing opportunity and EVERYONE who makes up the wonderful culture of American College of Education. Best decision I made."

- Codi Dunlap, graduate in the first cohort of RN to MSN students.

"I would tell a prospective student not to be afraid. ACE is there to catch you, to make sure that you're getting what you need and to make sure that you get to the finish line. I was the person who was terrified about going back to school. Now I wish I would've done this sooner."

-Eddie Rodriguez-Friere,
M.Ed. Instructional Design and Technology 2020

"I have been a nurse for almost two decades and an infection preventionist for five years, and never in my nursing career could I have imagined the challenges that have come with the global COVID-19 pandemic. The [RN to MSN] program has ensured my success as the sole infection preventionist in a rural hospital, while offering flexibility with its online program. I have taken advantage of more opportunities as a nurse leader because of the education and knowledge ACE has provided me." - Debra Meyer, RN to MSN student
